

I was looking forward to taking this WordPress class. I am very interested in web design and was hoping that I would learn enough detail to build my own website. My goal was to be able to build my own non-profit website as well as websites for others and possibly make a little side business out of my knowledge.

The class was excellent and served my purposes perfectly. Greg was very detailed in his instruction and went above and beyond in sharing his knowledge with the class. He was also patient with the differing knowledge levels and explained, when necessary, technical jargon, lingo, insights and opinions.

I left at the end of his series of classes with a broad knowledge of WordPress and will be able to set up a website.
